Dear Clear Creek Educational Community,

It has been my pleasure to serve as the Technology Director for Clear Creek School District over the past few months. The passion and drive of all of the staff of our school district is to be commended, and it has inspired me as we have been planning for a new and improved direction for technology at CCSD. This new direction will propel us to the next level in our educational goals. With that thought in mind, I am proud to announce a few changes that are happening, that I feel will take CCSD technology to the next level.

Beginning this year we will be providing every student at the Clear Creek High School level with a Chromebook to use at school, as well as to take home in order facilitate the use of modern technology in the classroom. Chromebooks will be handed out at registration, along with a case and a charger. We will also be providing parents with a new Chromebook policy that details the use of the Chromebooks. We hope to provide the Middle School with the same opportunity the following year during the 2018-2019 school year.

Along with these changes come added responsibility for both parents and students, as well as staff. In order to provide continued technology services and support, there will be a small technology fee at Clear Creek High School at the beginning of the 17-18 school year. This fee will be used for accidental damages to technology, as well as provide the software and services the technology needs to be most effective for students. The fee will start at \$20 and be dependent on income eligibility.

We look forward to the start of the 2017-18 school and the improvements to technology that will enhance student learning.

Thank You,
Galen Thompson - Technology Director
